FOR WHOM

- Claims Directors, Claims Managers and Senior Claims Executives with at least 5 years of experience in handling IAR/MB claims.
- Reinsurance Claims Managers with similar experience in handling IAR/MB facultative losses.
- Loss adjusters and claims technicians specialising in the adjustment of Engineering losses.
- Insurance and Reinsurance Brokers who have at least 5 years of experience in handling IAR/MB claims.

PROGRAMME HIGHLIGHTS

Most industrial or manufacturing businesses normally take up IAR coverage for their risks. The IAR covers might be extended to include MB coverage. Through the analysis and study of four practical and challenging case studies, the coverage provided under the IAR and MB Insurance policy will be discussed in detail during this 1-day intensive programme.

This programme will enable participants to apply the relevant advanced technical knowledge to handle IAR/MB claims more effectively through the study and sharing of practical case studies.

The case studies will be highly interactive depicting actual losses including loss photographs, video clips and report extracts in conjunction with actual adjustment of claims.

The programme is led by an experienced qualified engineer and former loss adjuster who will share his expertise to benefit the participants.

KEY LEARNING OUTCOMES

By the end of the programme, participants will be able to:

- Assess the scope and coverage of IAR/MB policies, and evaluate the various policy conditions, extensions and exclusions therein.
- Analyse the scope and application of IAR and MB policies, and differentiate their similarities and key differences.
- Apply the main claims conditions and principles (applicable to both types of policies) in typical claims handling processes and perform loss adjustments of complex claims.
- Apply the key endorsements and clauses applicable in IAR/ MB policies to complex claims.
- Evaluate the steps involved in application of policy excess, salvage and "other insurance" clauses in claims settlements.
