FOR WHOM

Underwriters and claims practitioners of insurance and reinsurance companies, insurance and reinsurance intermediaries, loss adjusters, risk surveyors and risk managers with more than 6 years of work experience in their respective capacities.

PROGRAMME HIGHLIGHTS

In recent times, the world has changed dramatically, resulting in new and a greater variety of emerging risks to businesses and consumers. Paradoxically, increased risk exposures have been brought about by ever-increasing demands to achieve strong economic growth, productivity and aggressive revenue growth, coupled with the need to manage operational costs with the use of new technology, innovations, automation and efficient processes. Together with geographical and product diversity, these have resulted in increased risks of death, injury, material damage and financial loss to a wider group of third parties caused by the failure, negligence, errors and omissions of humans and machines.

This 2-day programme will outline the legal liability exposures that could arise from this economic reality and examines whether current Liability Insurance underwriting and claims capabilities are adequate to handle them.

KEY LEARNING OUTCOMES

By the end of the programme, participants will be able to:

- Identify and understand new and emerging legal liability exposures arising from developing economic trends across the world.
- Understand whether existing Liability Insurance capabilities and products are adequate to manage the new exposures.
- Know how existing Liability Insurance capabilities and products can be enhanced or modified to manage the new exposures.
