PROGRAMME HIGHLIGHTS

The focus of this 28-hour course is on treaty reinsurance focusing on property classes of insurance. All participants are required to attend a two-hour briefing on the different capital regimes impacting reinsurance in ASEAN.

Participants will be grouped into teams to compete by country and demonstrate how they have understood and applied the concepts taught in the ASEAN Reinsurance Programme (ARP) or concepts previously acquired through other means of reinsurance training or practical experience, in designing an optimum reinsurance buying programme. Selected participants from each team will first need to present their own country's reinsurance landscape and factors impacting the reinsurance buying decision process in their country. Selected participants from each team will also compete based on presentations of their own country's case example and quizzes/assessments. Each team can choose 2-3 presenters for the respective presentations.

The winning team will win an AWARD or a PRIZE. All participants who meet the course attendance requirement (minimum 75% attendance with video switched on during virtual sessions) and pass the quizzes/assessments will be awarded with an ASEAN Certificate of Completion in Reinsurance Design & Buying Programme. Those who complete all the modules under the ASEAN Reinsurance Programme 2022 will be awarded with an overall Certificate of Completion

The ASEAN Reinsurance Programme is a first of its kind, multi-pronged talent and professional development initiative that combines technical training programmes with regional internships when conditions allow for it.

The Capstone Programme is suitable for:

participants who have completed the ASEAN Reinsurance Programme (ARP) or other types of reinsurance training programmes and with at least 2 years of experience in reinsurance programme designing and buying

OR

reinsurance brokers and reinsurance staff of direct insurers with at least 5 years of reinsurance experience

LEARNING OUTCOMES

By the end of the 28-hour course, participants will be able to:

- Know the latest updates on reinsurance claims.
- Understand the main characteristics and factors impacting the reinsurance practices of their own country and ASEAN.
- Understand the impact of key reinsurance clauses on the reinsurance programme.
- Apply the key considerations for pricing reinsurance.
- Apply the use of the different methods of reinsurance to design and place optimal reinsurance.
- Analyse and interpret the impact of different types of reinsurance structures on their company's financial position, and solvency ratios as required by their regulatory regimes.
- Apply the use of ILS and catastrophe bonds in reinsurance buying decisions.
- Analyse the impact of the pandemic crisis and catastrophe risks on the reinsurance programme.
- Understand the impact of climate risks on catastrophe models.
