# Significance of Cancer, Line of Treatment for Effective Claim Management

[Register Here](#)

**Venue:** To be advised

**Dates:** 27 & 28 May 2024

**Time:** 9.00 a.m. to 5.00 p.m.

## Programme Highlights

This training program delves into the profound impact of cancer on health insurance claims, addressing the financial implications for both insurers and policyholders. It offers an in-depth exploration of cancer pathology with a focus on major organs, providing a comprehensive understanding of various treatment modalities like surgery, chemotherapy, radiation, immunotherapy, and targeted therapies. The course is designed to equip participants with strategies for effective cancer claims management, taking into account the complexity and variability of cancer treatments. It also includes a detailed examination of myeloproliferative disorders and emphasizes the importance of collaboration among medical professionals, insurers, and claims managers for efficient cancer care and claim processing. Real-life case studies are integrated to illustrate practical challenges and applications in cancer claim management.

This program offers a vital learning opportunity for professionals in the health insurance sector, enhancing their capabilities in managing cancer-related claims with greater expertise and sensitivity.

## For Whom

Health and life insurance claims professionals, specifically those dealing with cancer-related claims.

## Key Learning Objectives

At the end of the programme, participants should be able to:

- Comprehend the intricacies of cancer pathology in various organs for accurate insurance claim assessment.
- Evaluate different cancer treatment methods, facilitating informed decision-making in claim management.
- Navigate the regulatory landscape pertaining to cancer insurance, ensuring compliance and ethical handling of claims.

## Programme Outline

- Overview of basic cancer pathology, including lung, liver, oral, stomach, breast, colon, cervix, brain, prostate, and kidney cancers.
- Examination of cancer treatment modalities.
- Detailed study of myeloproliferative disorders.
- Special focus on genetic testing for chemotherapy suitability; an in-depth look at immunotherapy, oral chemotherapy, monoclonal antibodies, and targeted therapies, particularly for prevalent cancers in the Singapore/APAC region.
- Application to claim assessment, claim management and ethical handling of claims

## Programme Leader

Dr. C H Asrani, a pioneer in medical audit and insurance risk management, brings 46 years of experience. With extensive work in insurance training globally and involvement with National Health Authority and The World Bank, Dr. Asrani specializes in underwriting insights, claim adjudication, and fraud prevention. His cloud-based solutions and X-Claims tool are at the forefront of innovation in the insurance industry.

## Programme Fee

Full Course Fee (incl. of 9% GST): S\$872.00
