[Register Here](#)

**Venue: Face-to-face training plus maritime excursion of Singapore's port anchorage**

**Dates and Time: 26 Aug 2024, (2.00 p.m. to 5 p.m.)  
27 Aug 2024, ((10 a.m. to 5 p.m.)**

## Programme Highlights

Embark on an enriching 1.5-day marine insurance course in Singapore, meticulously designed to integrate comprehensive classroom instruction with practical, hands-on experience at one of the world's foremost port anchorages. The journey begins with a focused three-hour classroom session on the foundational aspects of marine insurance. Participants will explore the variety and functionality of vessel types including bulk carriers, tankers, and container ships, understanding their critical contributions to international trade. The curriculum further delves into vessel architecture, emphasizing its significance in maritime operations, and examines the bustling activities of ports, especially those that rank among the globe's busiest. This discussion extends to the intricacies of cargo types, their handling, the risks involved, and the importance of obtaining adequate insurance.

The adventure continues into the second day with an extensive six-hour maritime excursion across the port of Singapore's eastern and western anchorages. Guided by the programme leader, this experience translates theoretical knowledge into real-world insights, offering participants a unique perspective on port operations, the strategic value of anchorage areas, and the practicalities of maritime logistics and insurance.

This course is thoughtfully crafted to provide participants with:

- A deep understanding of maritime operations, including insights into the design and function of various ship types and the life onboard merchant vessels.
- Knowledge on the challenges of cargo storage, handling, and navigation, tailored to different ship types.
- Insight into the management of specific cargoes, like grain, focusing on safety, hazard mitigation, and insurance implications.
- An overview of dry dock operations, with attention to the unique requirements of smaller vessels and bulk carriers.

By merging theoretical knowledge with practical exploration, the program offers a comprehensive view of marine insurance, not just as a field of study, but as a pivotal component of the global maritime and insurance industry. It represents a prime opportunity to grasp the complexities of marine insurance through both academic learning and firsthand observation in one of the world's premier maritime hubs.

## For Whom

- Insurance professionals looking to specialize in marine insurance.
- Maritime industry personnel seeking to understand risk management and insurance.
- New entrants to the insurance and maritime sectors.
- Legal professionals and consultants working with maritime law and insurance.

## Key Learning Objectives

At the end of the course, participants should be able to:

- Understand the types and structures of vessels and their relevance to marine insurance.
- Gain insights into the operations of ports and the logistics of cargo handling.
- Identify the risks associated with different types of cargoes and the importance of insurance coverage.
- Experience the strategic operational aspects of the Singapore port's anchorages and their impact on marine insurance.
- Understand maritime operations, including ship functionality and life onboard merchant vessels.
- Explain cargo storage challenges, handling, and navigational issues specific to various ship types.
- Gain insight into the management of grain and other cargoes, with a focus on safety and hazard mitigation.
- Gain an overview of dry dock operations and unique considerations for smaller vessels and bulk carriers.

## Programme Outline

### Day 1: Theoretical Insights into Marine Insurance (3 hours)

- Introduction to Marine Insurance: Overview of marine insurance, its history, and its importance in global trade.
- Types of Vessels: Detailed exploration of various vessel types, including their design, usage, and risks.
- Parts of a Vessel: Understanding the anatomy of ships and how each component plays a crucial role in maritime operations.
- Port Operations: Insights into the nature and operations of ports, focusing on Singapore as a case study.
- Cargo Types and Insurance: Discussion on various cargoes, their handling procedures, and the principles of securing them with marine insurance.

### Day 2: Practical Exploration of the Port of Singapore (6 hours)

- Eastern Sector Anchorage: Exploration of the anchorage area, focusing on types of vessels found, operations conducted, and their insurance implications.
- Western Sector Anchorage: Similar exploration as the eastern sector, highlighting differences in operations and their relevance to insurance.
- Risk Management in Action: Real-life examples of risk management and insurance application in the maritime industry.
- Global Commerce and Insurance: Understanding the global impact of maritime operations on insurance.

## Programme Leader

L M Mohamed Ismail serves as an Associate Director at Acclaim Insurance Brokers Pte Ltd in Singapore. His professional journey is marked by a rich tapestry of experiences, including a tenure as the head of a major India-based conglomerate. In this role, Ismail's responsibilities encompassed overseeing cargo surveys, vessel operations, and supervising the loading and unloading processes.

Transitioning to his current role, Ismail specializes in offering expert risk management counsel, particularly for high-value global shipments. His expertise extends to developing innovative tools tailored for industries involved in the handling of dangerous goods. This blend of practical experience and strategic acumen underscores Ismail's commitment to delivering impactful solutions in the realm of risk management.
